Telecom is at 3:30 888-422-7120 PIN 710536

Expected participants: Mark Kelly CEO & CTO PlateScan  
Jennifer Hanenberg IQP Program Manager  
✓ Mark McGovern my friend invited by Jen

I got frustrated with Daffy not contacting Jen therefore I called her yesterday and set this up. Daffy said he would do it, I told Jen that he said this.

### Objective of Telecom: 1st thoughts

1. Get enough technical info to support claims we can provide a Sit Awareness tool.
  - a. What do they have - hardware to image & illuminate cars and SW to find and read the license plate???
  - b. The SW needs # pixels on target, any comments on required field-of-view???????????
  - c. Will the SW run on a PC with our video - what video specs are required?????????????????
  - d. What can be done without adjustable optics?????
  - e. How adaptable is the SW, can I train it to look for other items - ID car type and color????
2. Get enough programmatic to prepare a presentation to Daffy *up duplication!*
  - a. What do they have - deliverable roadside/car mounted IR illuminated License Plate Readers (LPR)??
  - b. Have they delivered a complete system to IQT and has it been sent to their customer????????
  - c. Jen said they had delivered software for evaluation - what does this mean, I assume they have provided IQT with software to run on IQT video, not their customers??????
  - d. Can we get a current copy of the SW for evaluation by our Atlanta friends?????????????????????????????
3. Our application is to use a HD video recorder (cell phone, FLIP camera etc.) to observe ones surroundings and look for items of interest. Cars are one item there are others therefore our interest in training the SW.
  - a. Have they looked at small, high resolution cameras (no physical optics adjustment).
  - b.

Take a look at this -- we have to be a player. I'll show this to Daffy.

Results  $\rightarrow$  as getting SW to test?

→ camera options. - we will use cellcam (GD)

↳ They are looking at Cell Phone/ Blackberry

- Neural Net Can be trained ??

- body worn camera needs stabilization - blurs plate

2. Significance

> Prepared outline for IAT meeting objectives next week.

Key Points:

- have strategy for digestions during future content products
- update our "501 perspective for Senior Network 2"

△

21

- 2. Not wilderness and, that means "usable" to get off track. 17
- 3. I. I. A. → will give deliver and they will work
  - states I work after our last week
- 4. IRT - winning their search out beyond GSN

Thank to: Mr. McGovern -

Jim Smiley - Hows + hows managers find out what " ?

Tennite Hammer - Plate Scan Pac.

MY TTM strategy / Vision :-

Figure 1. The effect of the concentration of the inhibitor on the polymerization of  $\alpha$ -methylstyrene initiated by  $\text{TiCl}_4$  in  $\text{CH}_2\text{Cl}_2$  at  $-78^\circ\text{C}$ . The concentration of  $\text{TiCl}_4$  was  $1.0 \times 10^{-2}$  mole/l. and the concentration of  $\alpha$ -methylstyrene was 0.1 mole/l. The concentration of the inhibitor was 0.001 mole/l. (O), 0.002 mole/l. ( $\square$ ), 0.005 mole/l. ( $\triangle$ ), 0.01 mole/l. ( $\circ$ ).

 • Planned 1st Production Assistance:

> Complete Taron Nelson & Demo  
 script 8 & 7

then sell to CYPHAR

• Planned 2nd Assistant

• Notes Room minutes to all plans

process is similar  
to process in

(B) Bob, won't care / deploy of video  
cam - "Content" - stream  
to cellphone that is smart  
enough to process video for  
on detection

> - Motorola "Smart" than -  
could this be on SP platform  
can it process video - 2 processors

> I comment of SP to SP direct camera  
could direct link to MITEL Router  
video monitor -

Plan: - Visit GTRI for Demo!  
- Inform CYPHER - do some defining
